[site](#) [datasets](#)

Bring Your Own Data (BYOD) and create the coolest analysis or visualization

[repo](#)

We're open to suggestions!

Have an idea?

Two tracks means something for everyone! Tutorials provide entry points for those getting started. Hackathons dive deep into focused projects. Data will be made available, along with code and repos on github.

Organized by Jeremy Freeman, Nicholas Sofroniew, Michael Broxton, Logan Grosenick, Matthew Conlen, and Jeff Hammerbacher
